

Sea creatures

Do you know the names of these creatures? Can you find out? Write a list.

Use your body to move like a fish, then a turtle, then a star fish.

Draw around your hand to make a star fish picture. Will it have spikes? What colour will it be? Use your star fish hands to count in 5's. 5-10-15-20-25-30....

Under the Sea

Song time

1,2,3,4,5 once I caught a fish
alive

Baby Shark!!!

Cbeebies Iplayer

Andy's wild Workouts

Sea science

Make your own iceberg - freeze water in a box then float it in some water. What happens?

Salty water floating - fill a jug with water and watch some objects sink. What happens if we make the water really salty like the sea? Try using warm water to dissolve the salt.

Sea Sculptures!

Now flour is easier to find... Make some simple play doh and use it to make some sculptures of real, or imaginary sea creatures and corals.

Make labels for your creations: write its name, what it eats, how big it is.

- 1 cup of plain flour
- 1/4 cup of salt
- 3/4 cup of water
- 3 tablespoons of lemon juice
- 1 tablespoon of vegetable oil
- Food colouring

1. Mix flour and salt in a bowl.
2. Add water, lemon juice, oil and colour - mix really well then knead together to make it stretchy.
