Spring 2

A message from the staff...

Spring has nearly sprung and we look forward to warmer weather as we all return to school on Monday 8th March. We have missed you all and look forward to your safe return.

We are very excited about our new topics. This half term we are learning about the country, USA!! We are really pleased with the continued effort in which children and families have engaged with Seesaw, our online home learning platform. Thank you everyone.

Looking back...

This half term we will be learning...

Why do people visit the USA?

With this exciting topic you will learn about the vast physical and human features of the USA. You will compare New York city to Middlesbrough and compare the River Tees to the Mississippi River.

In science we will be learning about LIGHT!

The children will be learning to identify different light sources and how light travels and reflects on different surfaces, along with the dangers of UVA rays and how to protect themselves. Finally they will explore and investigate how shadows are formed.

22nd March is world water day click [here](#)
