Summer

WE ARE SO  
*Proud*  
OF YOU

A message from the staff

What a busy term! The children have been working extremely hard. We have been making the most of the sunshine during National Walking month and competing against other classes to complete the most laps of the playground.

## This term we will be learning...

To describe the movement of the Earth, and other planets, relative to the Sun in the solar system.

Remember, in order, going from the closest planet to the Sun, to the one that is farthest away, they are: **Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.**

We will be learning how to show the understanding of day and night through the use of a sundial and understanding the phases of the moon.

**In our history and geography lessons we will be answering the question How did the Industrial Revolution change Middlesbrough?**

We will be using maps to compare and track the growth over time of Middlesbrough using the railway as a guiding point. Can we find the original town square designed by Joseph Pease and track the growth to the south over time?
