Summer

KEEP SMILING

Message from the staff...

Welcome back to school and the start of Summer Term! We hope you all had a lovely rest over the holidays.

Everyone is glad to see the sunshine and the children are excited to get back and be able to play on the school field during break and lunch times.

This term we will be finding out..

Living Things and their habitats.

This term's topic is all about Living Things and their habitats. Children will be learning that most living things live in habitats to which they are suited. They will describe how different habitats provide basic needs of different kinds of animals and plants.

Working scientifically, children will be sorting, identifying and classifying different animals.

In history we will be finding out about, What is an explorer?

Children will learn about local explorer, Captain James Cook and why he is so important. They will look at his journeys and find out where he went and what he discovered.

In addition to this, they will learn about life at sea and how difficult it was for Captain Cook and his crew.

In DT, the children will be making their own hand puppets and learn different way to join materials together.
